

Replication of Regressions for “Development Effects of Electrification: Evidence from the Topographic Placement of Hydropower Plants in Brazil.”

Files included:

Stata Datasets:

Brazil_Electricity_data.dta: Unit of observation is a standardized county, decade. This is the dataset used for the main specifications, tables 2, 3, and 5-14.

Topographic_data.dta: Unit of observation is a gridded point across Brazil, decade. This is the dataset used for tables 1 and 4.

Stata Do file:

Brazil_Electricity_Regressions_do_file.do. To replicate the regressions in the paper, use the Brazil_Electricity_data.dta data file with this do file for tables 2,3, and 5-14. Use topographic_data.dta with the end of this do file for tables 1 and 4.
